FLO-THRU Low-Profile High Capacity Scalper

Separates at high rates in low-headroom areas

Flo-Thru VIBROSCREEN® separators employ two unbalanced-weight gyratory motors mounted on opposing exterior sidewalls of the unit (instead of one motor positioned beneath the screening chamber), reducing minimum height requirements significantly. This Kason innovation also enables the bottom outlet to be located directly below the top inlet, allowing material to fall vertically through the screen at high rates. Available from 18" to 84" (460mm to 2135mm) in diameter.

Options:

- "Air-Lift" Quick Screen Change System
- "Clamshell Lid" Quick Screen Change System
- Clean-In-Place (CIP) Design, Construction and Finish
- Design, Construction and Finish to Pharmaceutical Specifications
- Ball Tray Anti-Blinding Device
- Kleen Screen Anti-Blinding Device
