CENTRI-SIFTER® Separator with Integral Feeder

Integral feeders eliminate the need for separate feeders while reducing overhead space requirements. Powered by its own variable speed motor and drive, the unit offers independent control of material feed rates — regulated by the operator of the machine or from the control panel. The feed-controller also lengthens screen life by preventing overloads due to surging.

Options:

- Anti-blinding devices
- Bag Dump Station
- Clean-in-place (CIP)
- Twin centrifugal configuration
- Design, construction and finish to FDA, 3-A, BISSC, EEC and other sanitary standards
- Belt drive and Direct drive configurations
