Batch Dryer

With simple connections to an existing dust collector and power source, this fluid bed dryer system is ready to reduce the moisture content of boric acid from 10 to 0.5 percent on a batch basis. It combines a 40" (1016 mm) diameter vibratory fluid bed processor, heater, blower and controller on a caster-mounted skid.

Standard Equipment:

- Controls for inlet temperature, air velocity, bed depth, and retention time
- Quick-disconnect clamps for fast, thorough cleaning
- Choice of fluid bed air distributor
- High Torque motor drive with double extension shaft and eccentric weight adjustment system to optimize vibratory motion for specific materials
- Continuous or batch operation
- 304 Stainless steel contact surfaces
- Adjustable weir to control bed depth

Optional Equipment:

- Construction to 3A, FDA, and BISSC standards
- Clean-in-place spray heads
- Explosion proof electricals for hazardous applications
- 316 or higher grade stainless steel material contact surfaces
